

HazCom Compliance Checklist

To be compliant, an employer must:

- Train employees on hazards of chemicals in the workplace
- Provide instruction on how to recognize exposure to hazardous chemicals
- Provide training on container label elements
- Instruct workers on Safety Data Sheet (SDS) format and content
- Explain to employees how to access SDSs
- Update SDSs when new versions become available
- Update the written HazCom program as needed
- Explain to employees how to obtain a copy of the written HazCom program
- Train employees on any in-house labeling system used
- Make sure all container labels in the workplace are compliant
