

## Supervisor's Safety Checklist - Filter Respirators

**Supervisor:**

**Date:**                      **Department/Area:**

Yes	No	Checklist Area
-----	----	----------------

**All employees who wear a respirator:**

		Are Medically Qualified
		Have been fit tested for each make and model of respirator they wear
		Have been trained how to conduct a fit check each time they use a respirator
		Understand the limits of filter type respirators
		Know the filter change out schedule
		Understand how to read an "end-of-life" canister indicator
		Understand how to properly inspect, clean and store respirators

**Area Safety Check**

		Respirators, Filters & Canisters are stored in clean, dry areas away from sunlight.
		View plates are clean, no scratches, tight seal
		All filters & canisters are marked for type usage and efficiency
		Respirators are clean and ready to use
		Replacement canisters and filters are readily available to workers
		Respirator cleaning equipment is readily available to workers
		Employees inspect respirators prior to each use
		Employees conduct fit checks immediately after donning respirators
		Employees clean respirators after each use
